Silikal® Reactive Resin Floors in the Healthcare Industry

When your floors must be hospital, pharmaceutical, laboratory clean and sanitary.

For Hygiene Critical Environments, Silikal Flooring Systems Are The Only Solution!

Proven In The Field
For Over 55 Years
On Millions Of Square Feet

"With the experiences we have faced over many years, I would highly recommend using the Silikal resinous flooring products if you desire a quality, on time product that will stand the test of time and abuse."

Brian J. Eaton
Gilbane Building Company

Hygiene Critical Environments. They're all around us. Hospitals, pharmaceutical manufacturing, laboratories, and food processing and production are just a few examples of environments in which there can be zero tolerance for hygienic issues.

The demands on HCEs are many. Temperature fluctuations, chemical resistance, cleanability, and durability are key to maintaining HCEs.

Surfaces must stand up to aggressive disinfection measures, stain inducing substances, mechanical stress, and even frequent space re-purposing.

Slip resistance, chemical & mechanical wear resistance and design are some of the features that Silikal Flooring Systems provide in addition to being the most durable and cleanable systems available.

Silikal systems offer fast installations and low life cycle cost. At a time when cost and a successful operation are crucial, Silikal provides a flooring solution that pays for itself again and again.

Contact Silikal today to solve your flooring issues.

Silikal Advantages

Hygienic & Clean

- Monolithic, seamless surface
- Resistant to alkalis, acids, greases, oils, salts and other aggressive media.
- Easy to take care of

Safe

- Anti-skid surface grades
- Wear and tear resistant
- Can withstand hot and cold

Quick & Beautiful

- Extremely short curing times; no interruptions in business when renovations are made.
- Easy to lay, even at temps below zero.
- Selection of appealing colors; colored quartz sand or flake mixtures.
