U.S. Green Building Council
LEED Project Checklist fact sheet
Silikal Floor Systems

Materials & Resources

Credit 1.3 (1 point possible) Maintain 100% of existing building structure and shell AND 50% non-shell (walls, floor coverings and ceiling systems). Silikal floors typically last the expected life of the structure, are easily maintained and can be easily refurbished if damaged.

Credit 5.1 (1 point possible) Specify a minimum of 20% of building materials that are manufactured* regionally within a 500 mile radius. All floor components are assembled on site.

*Final assembly of components into the building product that is furnished and installed by the tradesman.

Indoor Environmental Quality

Credit 4 Low emitting materials

Credit 4.2 (1 point possible) Silikal Coatings meet or exceed the VOC and chemical component limits of Green Seal requirements.
