

Expect more from your floor.

Safe floors are part of the service at Silikal

Reactive resins from Silikal are hygienic, can withstand even the most extreme conditions and can be applied in lightning speed. The ideal footing for any area in hotels, restaurants, kitchens and canteens. Just the thing for new structures, renovations or repairs.

Where everything new

Silikal offers the ideal flooring for kitchens and canteens, completed overnight

A piece of cake to put down—the floor is fully cured and ready for action after only 2 hours. A perfect way to avoid standstills in your operations!

The services offered by hotels, restaurants, canteens and caterers are versatile and demanding. The expectations of a reliable floor-covering are equally large. For decades, the reactive resin flooring from Silikal has been offering a welcome solution in kitchens, washrooms, hallways, cold-storage rooms, cellars and storage areas.

Where it fits the bill

Everywhere, it does the job wherever something might hit the floor... where the soup slops or the cases are dragged over the floor, and where quite rightly the cleaning equipment is in constant use, here the use of a Silikal-flooring has already proved itself. With high scuff resistance, various anti-skid grades, attractive colours and being easy to maintain, it allows everything to run as smooth as butter behind the scenes in the hotel and catering establishments.

Needs run smoothly ...

Countertops in hotels and throughout the food industry:
Fast, robust, attractive

Proven in the field
For over 55 years
On many million m²

Where time is of the essence

Fast service included: Overnight, the necessary renovation of the flooring can be done without any expensive interruption to business. Within one to two hours the Silikal resins are cured and can be used to the full extent, even in winter at temperatures of down to -10°C .

Where hygiene requirements are at the forefront

Reactive resin flooring is resistant to fruit acids, alkalines, acids, oils, and fats. The seamless, sealed surface is completely nonporous and can be extended up the walls to build a closed basin floor if required. This means that no fissures, dusting or holes can form, which in turn reduces the colonisation by microbes and bacteria.

Where it must look good

Floors, which remain undamaged after years of continual stress in hotels and catering establishments, are standard by Silikal. But also interesting is that there are many possibilities for the creativity with coloured flooring, using a combination of pigments, silica sands and coloured flakes: floors with granite-effect, with integrated company logo or differently coloured flooring areas, everything is possible.

**Your call—Silikal!
An overview of the advantages.**

Hygienic and clean ...

- Monolithic, seamless surface
- Resistant to alkalis, acids, greases, oils, salts and other aggressive media
- Easy to take care of

Safe ...

- Anti-skid surface grades
- Wear and tear resistant
- Can withstand hot and cold

Quick and beautiful ...

- Extremely short curing times; no interruptions in business when renovations are made!
- Easy to lay, even at temperatures below zero
- Selection of appealing colours, e. g. with coloured quartz sand or flakes mixtures as standard
